RE: Path Forward, 900-3 (904 Pad) Characterization Results

Dear Mr. DiSalvo

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division (the Division) agrees, based on your prime contractor's declarations following characterization of surface soils beneath the 904 Pad, that No Further Accelerated Action (NFAA) to remove soil is appropriate

As previously agreed, a Data Summary Report format may be used to document an NFAA decision where analytical data indicate potential constituents (i.e., PCOCs) to be non-existent or inconsequential. It is our understanding that ecological action levels were exceeded for some constituents, infrequently, such that NFAA remains the appropriate response.

We look forward to reviewing the report, confirming the findings, and affirming NFAA.

If you have any questions regarding this approval, please contact me at (303) 692-3367, Harlen Ainscough at 303-692-3337 or Carl Spreng at 303-692-3358.

Sincerely,

Steven H. Gunderson
RFCA Project Coordinator
